EDUCATION

Ghulam Ishaq Khan Institute Of Engineering and Technology

Bachelor of Science in Computer Engineering

- CGPA : 3.12 / 4.00

Topi, KPK, PK

Aug. 2020 – May 2024

EXPERIENCE

Associate Software Engineer

Ebryx

Sep 2024 – Present

onsite, Lahore, Pakistan

- Maintained and developed Invisily's core components (Controller-Python, Gateway-C++, Sniffer-C)
- Implemented multi-tenancy and security policies (DLP, internet access) for enterprise clients
- Optimized scalability, boosting controller capacity from 1K → 10K+ clients and throughput from 10 → 200 logins/sec
- Resolved gateway/db bottlenecks and ensured reliable client sessions using Wireshark/tshark for packet analysis

Other Experiences

Software Motion Embedded as Software Engineer

remote, Suzhou, China July 2024 – Sep 2024

- Developed and optimized scripts for running SWCs on MDC board, Enhancing system performance.
- Streamlined testing processes, cutting execution time for SWCs with efficient script commands.

OneByte LLC as Software Engineer Intern

Lahore, Pakistan July 2023 – August 2023

- Collaborated with a team to develop a therapy chatbot website, focusing on using **React** and **Node.js**.
- Integrated **Firebase** for real-time database, ensuring secure user authentication and data management.

Institute of Engineering and Technology - GIKI Chapter as Event Coordinator

. 2023 – May. 2024

- Coordinated Giki Innovation Summit (GIS) national event and led team of **80+ students**.
- Registered 100+ students and secured 200,000 PKR sponsorship through outreach and company involvement.

PROJECTS

Client's(recruitment firm) Careers Portal & Website | React, TypeScript, Django, MongoDB, AWS Serverless,

- Developed and deployed the client's website using **React** and **TypeScript** on AWS serverless architecture, with a responsive and professional UI.
- Built and integrate backend server of a Careers portal using **Django + MongoDB** backend, enabling job search, job details, email APIs, and secure authentication..

Early Stage Skin cancer Detection | Python, Flask, React,

- Developed a full-stack skin cancer detection web app using **Flask** and **React** on an ISIC dataset.
- Applied advanced preprocessing and **DenseNet-201** (informed by literature review) to achieve **94%** lesion classification accuracy.

Online Therapy Chatbot (physecpilot) | JavaScript, Node.js, React, Firebase, Pinecone, ChatGPT APIs

- Developed a therapy chatbot using a three-tier architecture with **React.js**, **Node.js**, and **Firebase/Pinecone** .
- Implemented HTTPS encryption and **Firebase Authentication** for secure user access and chat log storage.

TECHNICAL SKILLS

Languages: Python, C/C++, SQL (Postgres), JavaScript, TypeScript, HTML/CSS.

Frameworks: React, Node.js, Flask, Django .

Familiar Databases: PostgreSQL, MySQL, MongoDB, Firebase, Firestore, Pinecone.

Developer Tools:Linux, Git, Docker, Wireshark, Postman, AWS, VS Code, Visual Studio, PyCharm.

Libraries: Pandas, NumPy, Matplotlib, Tensorflow, Bootstarp

SOFT SKILLS

Communication, Leadership, Teamwork, Adaptability, Resilience, Networking
